To whom it may concern,

I have had the opportunity to closely collaborate with Hoang Huy Pham on research related to Content-based Image Retrieval (CBIR), a prominent and evolving area of study. It is with great enthusiasm that I provide my strong recommendation for Hoang as an outstanding candidate for your MSc Artificial Intelligence program.

Hoang has been actively engaged in diverse research responsibilities, encompassing coding, rigorous evaluation, regular participation in weekly discussions, and diligent research document preparation. His proficiency extends beyond theoretical knowledge in Artificial Intelligence, with a particular strength in Deep Learning. What truly distinguishes Hoang is his exceptional organizational acumen and systematic approach, as evidenced by his groundbreaking findings in our collaborative work.

Hoang has a very decent personality and is a very pleasant student as well as a partner to deal with. He is also one of the very few undergraduate students who took on the challenge of international research which requires a significant amount of commitment. Thus, his incredible contribution to the research's results is a testimony to his distinctive academic capability and perseverance.

I therefore strongly support Hoang's application for your MSc Artificial Intelligence program.

Yours sincerely,

Quynh Nguyen Huu

Lecturer, Associate Professor

Dean of Faculty of Information Technology
